

RISHABH SHARMA

Product Leader | Vice President — Product Management, JP Morgan | Digital Banking Platforms, AI & Cloud

Bengaluru, India · +91 70877 50777 · rishabh071106@gmail.com · linkedin.com/in/rishabhsharmaimk · brodoit.com

PROFILE SUMMARY

Product leader with 15 years in banking and financial services across US, UK, EMEA, APAC, and Africa. Currently Vice President — Product Management at JP Morgan, owning the strategy, vision, and multi-year roadmap for the global digital loan booking platform — connected via APIs and Kafka across many upstream and downstream systems, and moving toward straight-through processing powered by a multi-agent AI architecture. Scaled platform user adoption from 40% to 85% in 12 months through UX redesign, embedded analytics, and structured change management. Earlier, spent six years in Johannesburg leading Standard Bank's core banking modernization, integrating 26 partner platforms across self-service, branch, and back-office channels. Experienced in Agile/SAFe delivery at scale in complex, regulated environments. IIM Kozhikode Executive MBA; pursuing M.Tech in Artificial Intelligence from IIT Bhilai.

KEY SKILLS

Product: Product Strategy & Vision · Roadmap Ownership & Prioritization · Product Discovery & A/B Experimentation · North Star Metric, KPIs, OKRs · P&L & Go-to-Market · User Adoption & Product-Led Growth · UX (Figma, React prototyping)

Technology: APIs (REST, GraphQL) · Kafka & Event-Driven Architecture · AWS Cloud · Microservices · Agentic AI & Multi-Agent Architectures · LLMs, RAG, MCP · LLMOps & Responsible AI · Straight-Through Processing (STP)

Data: SQL · Snowflake · Databricks · Tableau · Amplitude · Embedded Analytics & BI

Leadership: Executive Stakeholder Management · Cross-Functional Alignment (Product, Engineering, Design, Data) · Transformation Leadership · Hiring & Mentoring · Change Management · Agile / SAFe at Scale · JIRA, Confluence

Domain: Digital Banking · Syndicated Lending · Corporate & Commercial Banking · Core Banking Modernization · Loan IQ, ACBS, SAP · AML Compliance

WORK EXPERIENCE

Vice President — Product Management, JP Morgan Chase & Co.

Bengaluru, India · Jun 2020 – Present · Promoted AVP (2020) → VP (2023)

- Own the product strategy, vision, multi-year roadmap, and P&L narrative for JP Morgan's digital loan booking platform serving Syndicated Portfolio Lending across Corporate & Investment Banking and Commercial Banking in US, UK, EMEA, and APAC.
- Drive roadmap prioritization and trade-off decisions across business and technology; work day-to-day with engineering, design, and data teams to manage dependencies in a global, matrixed organization.
- Built the booking platform's connectivity across many systems — standardized APIs and Kafka-based event streaming linking upstream and downstream platforms (Loan IQ, ACBS, underwriting, risk) into one coherent booking flow.
- Led the platform's transformation toward straight-through processing — designing a multi-agent AI architecture where agents handle LLM document extraction, RAG-powered covenant intelligence, and operator copilots; delivered measurable FTE optimization and cycle-time compression.
- Scaled user adoption from 40% to 85% in 12 months via a product-led playbook: modern React UI, embedded Tableau dashboards, in-app analytics, and a disciplined discovery-and-experimentation loop with global Relationship Managers and operations.
- Established the product's AI governance framework, data strategy, North Star Metric, KPI framework, and experimentation culture; present strategy, demos, and outcomes to senior stakeholders including Managing Directors and regional leadership.

Senior Consultant (final role), Wipro Technologies

Pune / Chennai / Johannesburg · Oct 2011 – Jun 2020 · Clients: Citibank, Standard Bank of South Africa

- Led end-to-end core banking modernization at Standard Bank of South Africa — SAP target architecture, COBOL migration, and integration of 26 partner platforms across self-service, branch, and back-office channels into one unified digital experience.
- Directed a high-impact AML compliance programme in a complex, regulated environment — delivered a zero-finding audit under regulatory scrutiny.

- Championed the bank's Waterfall-to-Agile transformation (2016) with sprint cadence, PI planning, and cross-functional pods; managed a 38-person globally distributed delivery team across India, South Africa, and the UK.
- Prototyped an AI delivery assistant (pre-GenAI); earlier delivered multi-year Citibank programmes in Pune (core banking, cards, operations) as Project Engineer.

EDUCATION

- M.Tech — Artificial Intelligence, IIT Bhilai (ongoing)
- Executive MBA, IIM Kozhikode
- B.Tech — Electronics & Communication, Jaypee University of Information Technology
